Execution Scenarios

Mile

The screenshot shows a window titled "Length Converter". On the left, there is a text input field containing "0.1". To its right, the unit "Kilometer" is displayed in a large, bold font. Below the input field, the converted value "6.000000e-02 Miles" is shown. To the right of this value is a small dropdown menu with three dots and a blue arrow icon. At the bottom left, there is a button labeled "Convert!".

Yard

The screenshot shows a window titled "Length Converter". On the left, there is a text input field containing "0.1". To its right, the unit "Kilometer" is displayed in a large, bold font. Below the input field, the converted value "1.093600e+02 Yards" is shown. To the right of this value is a small dropdown menu with three dots and a blue arrow icon. At the bottom left, there is a button labeled "Convert!".
